

INSTITUTIONAL DISTINCTIVENESS

1. Organ donation can save a life. In order to create awareness amongst our students and the society regarding the importance of organ donation, a rally was organized wherein the students of the college actively participated and spread a message related to this important cause.
2. Mental wellness is as important as physical wellbeing. To propagate this message to our students, seminars on varied topics such as character building and culture development were organized at college where eminent speakers guided the students and faculty explaining the connection between Science and culture. Through these seminars and talks students were encouraged to be better citizens and more importantly better human beings.
3. In this globalized world, culture becomes an intermediary for bridging the gap between countries. A group of our students representing the Rajasthani Folk culture visited and performed their art at the Skyline University, Sharjah, UAE under the cultural exchange program.
